Weight	Approx. 80-120g
Dimensions	Compact travel-size (pocket-friendly)
Color Options	Available in multiple colors
Capacity	Holds 3-5 dongles, 2-3 USB drives, multiple cables

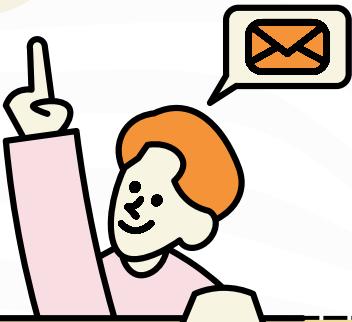

OUR DESIGN STORY

Hublet was created to fix a real, everyday problem: tangled, easy-to-lose cables and dongles. Surveys showed that although most people use these accessories daily, many still struggle to keep them organized while traveling.

So we designed Hublet with modular sections, a secure lock, and lightweight 3D-printed PLA. After several iterations, it became a compact, durable, and stylish organizer made for travelers who value simplicity and a clean everyday carry.

Thank You!

Thank you for choosing Hublet! We hope it brings order and simplicity to your tech-filled life.

HOW TO USE YOUR HUBLET?

01 Open the Lid

Unlock and lift the lid to reach your accessories.

02 Organize Your Accessories

Place dongles in compartments, coil cables in the wire section, and slide USB drives into their slots.

03 Close and Lock

Close the lid and lock it to keep everything in place during travel.

04 Store & Access

Keep Hublet close for organized, protected accessories.

WHY HUBLET?

- Eliminates the frustration of tangled cables and lost dongles
- Compact and portable
- Protects expensive accessories from damage
- Eco-friendly PLA material is sustainable and durable
- Saves time - find what you need instantly
- Clean aesthetics

SAFETY GUIDELINES

- ⚠ Don't overfill compartments to ensure proper closing.
- ⚠ Keep away from water and moisture.
- ⚠ Avoid drops or impacts that can crack the PLA body.
- ⚠ Keep out of reach of small children.
- ⚠ Always lock the lid before traveling.

CARE & MAINTENANCE

Regular Cleaning

Wipe with a soft dry cloth; use a lightly damp cloth for tougher marks.

Check Locking Mechanism

Inspect the lid and lock occasionally; clear debris from hinges.

Storage

Keep in a cool, dry place away from direct sunlight and heat.

Avoid Chemicals

Avoid harsh chemicals, solvents, or abrasive cleaners.
